

CE Semiannual Editorial Index

January-June 1970

Associations

A-Es and Legislators Talk It Over, *Jane Edmunds*, p121, April.

ASAE Dedicates New Headquarters, p121, June.

ASCE Selects Armco Steel Works as the Outstanding Civil Engineering Achievement for 1970, p122, May.

ASME Competitive Bidding Code Challenged, *Ralph Torgerson*, p126, January.

A Bouquet to the Feds, *Art V. Maxwell*, p34, March.

CEAC Studying Ways to Hone Members' Business Practices, *Ralph Torgerson*, p114, April.

The Construction Cost Engineer, *William R. Orr*, p26, January.

Employee-Employer: Relationship in Transition, *Robert E. Myers*, p32, February.

Engineering's Influence on People, Products Reflected in CEC Awards, p98, June.

Flavor of America's Past Awaits CEC Conventioneers in Boston, *Stanley Cohen*, p94, May.

Formidable competition indeed, *Art V. Maxwell*, p62, February.

Human Habitat 1994 ASHRAE Meeting Theme, *Ralph Torgerson*, p220, March.

JCEP Probes Employee Relations, *Jane Edmunds*, p110, January.

Let's Not Overreact, *Thomas B. Robinson*, p38, June.

Let's talk turnkey, *Art V. Maxwell*, p60, May.

New Concepts in Engineering Registration, *Leo W. Ruth*, p226, March.

PEPP Attacks Ethics of Bids, Ads, *Jane Edmunds*, p102, February.

PEPP's Retirement Plan, *William J. Deevy*, p50, May.

Practice Changes Forecast at CEC Regional Meeting, *Jane Edmunds*, p208, March.

Professional Liability - Professional Service, *Roger W. Loveless*, p40, April.

The Proposed Merger, *Art V. Maxwell*, p74, January.

Wait until next year, *Art V. Maxwell*, p68, April.

Working at the Grass Roots, *Morton S. Fine*, p62, June.

Business Aspects

A-Es and Legislators Talk It Over, *Jane Edmunds*, p121, April.

Albert Kahn Associates Marks 75th Anniversary, p109, May.

CEAC Studying Ways to Hone Members' Business Practices, *Ralph Torgerson*, p114, April.

Design Profession's Future Depends on Cooperation, *Rex Whitaker Allen*, p81, January.

Engineering Cost Estimates: Who Needs Them?, *Allen B. Allerbox*, p88, February.

Federal A-E Selection at Issue, p128, May.

How Our Firm Trains Its Managers, *Francis A. Sanders*, p90, June.

Liability, Responsibility Probed at AMA Seminar, *Jane Edmunds*, p130, June.

Management Hints for Consultants, *John D. Cole*, p74, February.

Mergers, Acquisitions on the Upturn, *Jane Edmunds*, p138, May.

More Mergers, Acquisitions, p124, June.

Nonprofessional Ownership, *C. Maxwell Stanley*, p76, May.

Open Letter to Senator Fulbright, p120, January.

Resolving Conflicts in Professional Engineering Organizations, *Vernon E. Swanson*, p81, February.

Cover

E. Montford Fucik, April.

Leo L. Landauer, June.

Thomas B. Robinson, May.

Billy T. Sumner, February.

Economics

Construction's 1970 Economic Outlook, *William R. Park*, p84, January.

Construction Strikes and the Economy, *William R. Park*, p30, June.

An Economic Solution to Industrial Pollution, *William R. Park*, p133, January.

An Economic Solution to Industrial Pollution, *William R. Park*, p52, February.

Probability and Project Evaluation, *William R. Park*, p36, May.

Screening New Projects, *William R. Park*, p60, March.

Sensitivity Analysis for New Projects, *William R. Park*, p23, April.

Engineering and Design Concepts

A-E Firm's Research Center Studies New Design Concepts, *Ralph Torgerson*, p116, May.

. . . And Not a Drop to Drink - Methods Needed to Stop Drain of Water Supply, *Konstantine L. Kollar* and *Robert Brewer*, p168, March.

ASCE Selects Armco Steel Works as the Outstanding Civil Engineering Achievement for 1970, p122, May.

Automation Techniques Forcing Industry to Shift Gears, *B. T. Hensgen*, p134, March.

Calculating Time of Concentration for Use in the Rational Formula, *Alfred R. Pagan*, p92, April.

Changing Shape of Industrial America, p110, March.

Conservation of Land Resources, *George D. Clyde*, p172, March.

Dirty Air: A Gross National Product, *Russell C. Taylor*, p156, March.

Dominican Santa Cruz Hospital Design Exemplifies a Coordinated A-E Effort, p82, January.

8" Concrete Block Bearing Wall Design a First in D.C. for a Six-Story Building, *Allen J. Wright*, p96, February.

Engineering Cost Estimates: Who Needs Them?, *Allen B. Allerbox*, p88, February.

Engineering's Influence on People, Products Reflected in CEC Awards, p98, June.

Environmental Problems Need Engineering Solutions, *Ralph Torgerson*, p196, March.

Estimating Procedures for the 200 BeV Accelerator, *Dwight B. Mapes, Jr.*, p78, February.

European Countries Adapt Building Construction to Available Materials, *E. Ralph Sims, Jr.*, p90, June.

The Growth of the Industrial Park . . . New Community Complex to Have Airport as Hub, *Charles C. Schimpeler*, p176, March.

Industry and the Human Environment, p107, March.

Industry's Role in Rebuilding the Cities, *Richard L. Forster*, p114, March.

Industry Weighs Many Problems in Plant Location, *Louis Berger*, p181, March.

Isolating Structures From Earthquake Ground Motions, *Marc S. Caspe*, p82, April.

National Standards Needed to Stem Tide of Pollution, *T. C. Williams & A. Edward Ward*, p146, March.

1-Industry Towns Start Countdown for Survival, *Charles T. Main, II*, p119, March.

Operation Breakthrough Zeroes In on Total Urban Complex, *George Romney*, p108, March.

Planned Community Development, *Elias W. Pritchard*, p184, March.

Practical Dreamer, *Dr. Irvin Ross*, p81, May.

Project Management — Coordination of the Various Disciplines, *Klaus C. Ruhland*, p94, April.

Rogers Designs Del Monte Complex, p124, February.

Routing Floods Through Reservoirs, *Alfred R. Pagan*, p84, February.

Solid Waste: Industry Notes a "Third Pollution," *Paul H. Woodruff*, p151, March.

Specifying General Requirements for Soil Test Borings, *William W. Mishell*, p86, February.

Three Stories Added to the First Prestressed Garage in New York City, *William S. La Londe, Jr.*, p98, May.

Traffic Flows Uninterrupted While Rebuilding 100-Year-Old Railroad Bridge, *F. C. Livingstone*, p92, January.

Transportation: Eve of a Renaissance, *Louis W. Riggs*, p141, March.

Ulteig Engineers Win Public Service Award, p190, March.

Using Computer Time Sharing for Solving Surveying

Problems, *Joseph A. Miller Jr.*, and *Russell B. Norrell*, p99, April.

Utilities Are Plugging in to Handle Industry's Big Power Play, *Riley D. Woodson*, p160, March.

Legal Aspects

CEs Must Prepare for Affirmative Action on Antidiscrimination Plans, *Edward F. Malone*, p44, May.

Enforceability of Noncompetition Agreements, *Edward F. Malone*, p46, March.

Engineers and the Unauthorized Practice of Architecture, *Edward F. Malone*, p46, April.

Maintenance of Business Records With an Eye Toward Litigation, *Edward F. Malone*, p52, June.

Professional Liability Insurance Carriers' Duty — and Right — to Settle, *Edward F. Malone*, p60, April.

Strict Liability for Damages from "Abnormally Dangerous Activity," *Edward F. Malone*, p68, January.

Professional

The CE Versus Engineering Education, *H. P. Pittelko*, p89, January.

College Seniors Opt for CE Jobs, *Lane H. Mashaw*, p89, April.

Design Profession's Future Depends on Cooperation, *Rex Whitaker Allen*, p81, January.

Engineering Education — Too little? Too much? *Dr. Charles Hadley Weaver* and *William B. Faris*, p86, January.

The Need for Unity Among Consulting Engineers, *John K. M. Pryke*, p102, January.

Survey of the Profession — A look at projected business volume for the year 1970, p76, January.

Public Relations

Engineering and PR — A New Alliance, *Andrew Warren Weil*, p22, June.

The Grass is Always Greener, *Andrew Warren Weil*, p38, February.

New Lessons From the Good Book, *Andrew Warren Weil*, p106, April.

The Opportunity Is All Yours, *Andrew Warren Weil*, p70, March.

What About Your Next Brochure?, *Andrew Warren Weil*, p28, May.

Your Biggest Blind Spot — Yourself, *Andrew Warren Weil*, p62, January.

Tax Topics

Another Angle to U. S. Bonds, *Carl H. Ristau*, p34, January.

Club Dues, *Carl H. Ristau*, p18, February.

Maximum Tax on Earned Income, *Carl H. Ristau*, Tax Reform Act of 1969, *Carl H. Ristau*, p78, March.

Tax Reform Act of 1969 — Part 2, *Carl H. Ristau*, p18, April.

Tax Reform Act of 1969 — Part 3, p66, May.

Tax Reform Act of 1969 — Part 4, Minimum Tax on Preferences, *Carl H. Ristau*, p46, June. ▲▲

More About Other People's Money, *William R. Park*, p18, December.
Optimum Size for CE Firms: The Bigger the Better, *William R. Park*, p58, October.
Other People's Money: The Best to Invest, *William R. Park*, p56, November.
Post-Investment Appraisals, *William R. Park*, p30, August.

Keep Moving

DOORS OPEN OR CLOSE IN 3 SECONDS
WITH AIR-LEC POWER

A standing truck of product is a time robber. Every time a factory door must be pushed open or closed by hand, valuable minutes are lost. Automatic powered Air-Lec Door Operators respond instantly, safely. No control is lost over area temperature and environment. Quickly pays for itself. Send for Free Planning Kit.

AIR-LEC Industries, Inc.
3300 Commercial Ave. • Madison, Wis. 53714
Dept. 11

Look into easily-installed, dependable, 10 year-proven high-density polyethylene Uni-Pipe for unstable soil installation, high water tables, water-crossing installations. Economical Uni-Pipe can be joined atop trench. In diameters 2" to 40" O.D. for new installations or re-lining.

Tax Reform Act of 1969 — Part 7, Charitable Deductions, Carl H. Ristau, p78, September.

Tax Reform Act of 1969 — Part 8, New Depreciation Rules, Carl H. Ristau, p26, October.

VERSATILITY:

One Sarco "25" Valve Body Does 7 Different Control Jobs All Efficiently

With a "T" pilot you've got a Temperature Regulator, ranges between 0-300°F.

Put a "P" pilot on to make a Pressure Regulator to 250 psi — reduced 3 to 200 psig.

An "E" pilot makes it an on/off remote control electric regulator.

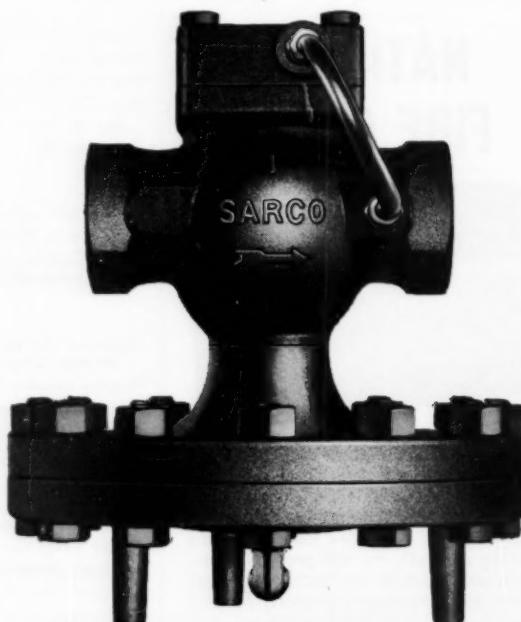

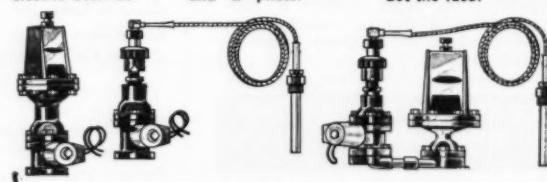

Want a Pressure-Temperature Regulator? Add a "P" and "T" pilot.

"P" and "E" pilots make it into a Pressure Regulator with on/off electric override.

A Temperature Regulator with on/off electric override is yours with "T" and "E" pilots.

And now! . . . use "P" and "T" and "E" pilots and you've produced a Pressure-Temperature Regulator with on/off electric override. Got the idea?

Select the pilot (or pilots) and the "25" Valve is ready to do any one of seven different control jobs — efficiently and economically. Sizes from $\frac{1}{2}$ " to 4". For free handy selector guide giving full details on control capabilities write today.

Sarco Company, Inc., 1951 26th Street S.W., Allentown, Pa., 18105.
